WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

PI NOTES, A PUBLICATION OF CIA IMAGERY ANALYSIS DIVISION, HIGHLIGHTS SIGNIFICANT INTELLIGENCE ITEMS DERIVED FROM PHOTOGRAPHY, AS WELL AS CURRENT DEVELOPMENTS IN THE "PI" FIELD.

P.I. NOTES 30/66

IAD DEVELOPMENTS

We would again like to remind our readers that the Division will be presenting a "COUNTY FAIR", 11 - 13 April 1966, Room 1 G 55, Headquarters Building, from 0900 -1600 each day. The displays summarize what your CIA photo intelligence unit can do in support of your research. In addition, IAD personnel will be on hand to discuss all aspects of imagery interpretation with you.

25X1A

At the request of the Director, ORR, [REDACTED] Chief/IAD, and [REDACTED] Chief/Requirements Branch/Reconnaissance Group/CGS, presented a general briefing in the Main Auditorium, Headquarters, on 6 April 1966, to several hundred analysts, primarily from ORR. The purpose of the briefing was to review the field of imagery analysis, discuss its intelligence potential, and outline current requirement procedures in use in CGS and IAD.

During the period 27 February - 26 March 1966, 159 requirements were received from the following requesters:

<u>DDI - 79</u>	<u>DDP - 33</u>	<u>DDS&T - 46</u>	<u>DDS - 1</u>
ORR - 35	FE - 15	FMSAC - 20	OTR - 1
OBI - 25	WH - 10	OSI - 26	
CGS - 7	SOD - 5		
OCI - 6	NE - 2		
IAD - 3	FI - 1		
NPIC - 3

CHINA

Recent collateral reports indicate that transloading facilities on the Peking - Ulan Bator - Moscow rail line have been transferred some 200 miles, from Chi-ning in North China (41-03N 113-06E) to Erhlin on the China - Mongolia border, and that the gage of the line in China is now changed from the USSR broad gage (5 ft.) to the Chinese standard gage (4 ft. 8 inches). Transloading between the 2 gages has hitherto been

A comparison of photography taken [REDACTED] shows that considerable dredging has taken place and 2 new piers are under construction.

According to the 5-year plan published in Mogadiscio in 1963, the Berbera Port will eventually be capable of handling 200,000 tons of cargo annually. When completed, it will have piers for berthing 10,000-ton vessels with a maximum draft of 30 ft., a pier for coastal vessels, a ship repair facility, a radio station, a hotel, and other port facilities. Recent reports indicate the USSR also plans to install radar equipment at this port.

An arms agreement between the Somali Republic and the USSR was concluded in October 1963. Under this program considerable military shipments have been delivered to the Somali Republic, including the POLUCHAT Class Coastal Patrol Boats which have been observed at Berbera. Normal port of entry for these shipments has been Mogadiscio, but deliveries have also been made at Berbera, Uarschieh, and Chicimaio, utilizing pontoons.
